WORK EXPERIENCE

ID/X Partners – Data Scientist Project Based Intern

Jul 2025 – Present

- Built supervised models (Logistic Regression, Random Forest, XGBoost) for classification tasks using Python.
- Performed model evaluation using metrics such as F1 Score, MAE, RMSE, and visualized lift charts and error distributions.
- Stored and queried structured data in PostgreSQL and MySQL using complex SQL queries.
- Developed business intelligence dashboards in Power BI and Tableau for KPI monitoring.

Kimia Farma – Big Data Analyst Project Based Intern

Jun 2025 – Jul 2025

- Developed interactive performance dashboards using Power BI, based on SQL-extracted and processed datasets.
- Performed data preprocessing, cleaning, and exploratory data analysis (EDA) using Python (pandas, NumPy, matplotlib, seaborn).
- Supported strategic business planning for the upcoming fiscal year by providing actionable insights and historical performance analysis.

Bank Muamalat - Business Intelligence Analyst Project Based Intern

May 2025 – Jun 2025

- Developed and maintained interactive dashboards using Power BI and Looker Studio.
- Applied data modeling principles to support dashboard scalability and ensure consistent reporting structures across business units.
- Performed exploratory and statistical data analysis using Python (Pandas, NumPy), enhancing problem-solving in sales performance trends and fraud detection patterns.
- Gained exposure to enterprise data environments such as BigQuery, aligning with data warehousing best practices and contributing to scalable reporting solutions.

YMJ – Administration Staff

Feb 2024 – Feb 2024

- Managed Shopee B2C store operation: sales, marketing, product listing, and inventory updates.
- Maintained accurate records of customer transactions, invoices, and inventory data using Microsoft Excel for tracking and reporting purposes.
- Provided administrative support to the sales and marketing team, including handling customer inquiries, order processing, and delivery scheduling.
- Created detailed spreadsheets using formulas, pivot tables, and data validation in Excel to streamline workflows and improve data analysis.

Imahnoong – Intern Staff

Sep 2021 – Nov 2021

- Analyzed light pollution data using Python and created educational resources with Jupyter Notebook for public engagement.
- Designed virtual observation workflows and managed scientific communication through social media.
- Supported content planning and outreach, combining technical insights with clear communication for general audiences.

EDUCATION

Data Science Specialization Bootcamp – Rakamin Academy

Oct 2024 – Mar 2025

Learned end-to-end Data Science processes: SQL, EDA with Matplotlib and Seaborn, preprocessing with Pandas, modeling using Scikit-learn, and delivering business insights. Built a machine learning model with NLTK for text classification of job vacancies and visualized category distributions.

Belajar Dasar Data Science – Dicoding***Dec 2024 – Jan 2025***

Gained knowledge in data science fundamentals, data exploration, tools and technologies, and basic machine learning concepts.

Institute Technology of Sumatera - Bachelor of Science***Aug 2018 – Jan 2024***

Major: Atmospheric and Planetary Sciences

SKILLS

Technical Skills: SQL, Python (Pandas, Jupyter, NumPy), Looker Studio, Big Data, PowerBI.

Personal Skills: Communication, Planning & Problem Solving, Teamwork, Analytical Thinking, Time Management

Language: Bahasa Indonesia (Native), English (Professional)
